Objective

To design a search-cum-choice engine(ELEKTOO) which enables users to make an informed and quick choice search about a product with the purpose of buying the product online or offline.

What is Elektoo?

- Elektoo is **choice engine**.
- Enables user to make informed and quick choices.
- Search using two options:
 - Choice query box
 - Choice Matrix

Problems Elektoo is trying to solve

1. Choice overload
2. Wrong choice
3. Unavailability of choice centric IT solutions

Choice Query Box

- Fetches written query
- Features
 - Auto-complete
 - Auto-correction
 - Resolving ambiguity
 - Real time update of count of results

UI display

	Number of reasults found	Search Button
--	--------------------------------	---------------

Search Query(takes input from
user)

Choice Matrix

- Choice matrix displays filters and their values
- Features
 - Real-time state change
 - Real-time update of count

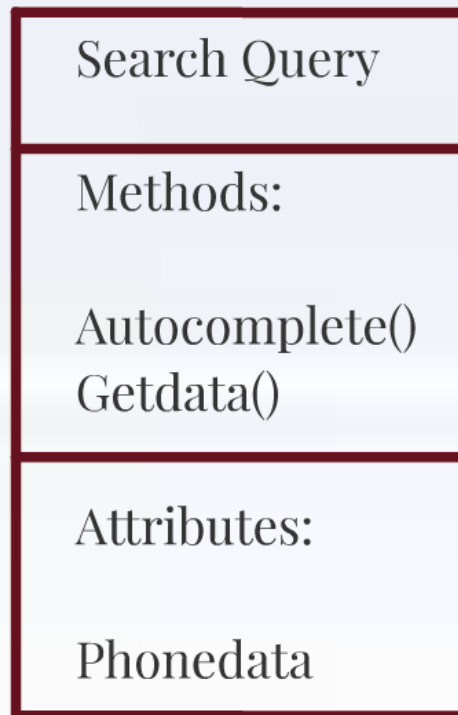

UI Display

Features				
Price				
Screen Size				
Memory				

Options updated in real time

Class Diagram

Tech Stack

Backend:

- MySQL
- Node.js
- Sequelize.js
- Express.js
- Javascript

Frontend:

- HTML,CSS
- js render
- Ajax
- jQuery
- JSON
- Angular.js

Goals achieved so far

- Choice query box
- Features implemented
 - Auto-complete
 - Display result

Final Expectation

Choice Query Box

- Auto Complete
- Auto Correct
- Resolve Ambiguity

Choice matrix

- Real time state change
- Go back to the previous state

Learning system, Pagination, Real-time
update count of results, Sharing
Results.

tocomplete()
tdata()
